### **Before Installing**

- Close Excel before you begin installation.
- Occasionally certain anti-virus software can interfere with installation. If your software does not install correctly, we recommend switching off the anti-virus and running the installation again.

### Install

- 1. Once the SpatialXL install file is downloaded, double click on it to run it.
- 2. Select 'Install for me only (recommended)'. If you want to install for all users, you will need admin rights.

3. Click 'Next'.

4. Read and accept the license agreement, then click 'Next':

5. Optionally change the start menu folder that the program's shortcuts will be stored in, otherwise accept the default and click 'Next':

6. If you want a desktop shortcut to be created for the program, check this on, then click 'Next':

## Troubleshooting

#### When I install SpatialXL I do not see the SpatialXL tab appearing in Excel.

Sometimes the add-in is not activated in Excel. You can turn on this add-in by going to the File > Options > Add-ins > Manage Com add-ins > Go You can then activate the SpatialXL add-in by making sure it is selected and pressing OK.
